

SIMPLIFY YOUR ANALYSES AND OPTIMIZE YOUR RESOURCES.

Save Time. Simplify your operations. Reduce costs.

Revolutionize your water testing with Aquassist! Say goodbye to traditional, complex and time-consuming methods! Aquassist simplifies and automates your analyses with a fully automated system that combines an intuitive app, connected devices and evolving technology. Every step is designed to simplify and optimize monitoring. The result: a reduction in testing time of up to 40%, designed to save you time and optimize your productivity.

Aquassist also gives you access to precise data on your water and energy consumption and CO₂ emission, so you can improve your performance and reduce your environmental footprint. Aquassist isn't just a tool - it's your partner in transforming operations and achieving goals effortlessly.

AQUASSIST IS :

- Up to 40% of time saved on your daily tasks, so you can concentrate on your priorities strategically.
- A connected solution for faster and more accurate results.
- A sustainable approach with concrete monitoring of your environmental impact.

"Thanks to Aquassist, we save time, and the connected devices have helped simplify our water analysis process. It's reassuring to know that the data analysis is accurate."

- Lead Hand, Markham District Energy

BENEFITS:

Automate and save time

- Centralized data with alerts for critical points.
- Clear and simple same-day automated reporting.

Optimize your inventory and mass balance

- Automatic monitoring of inventory and product consumption.
- Automated ordering option to avoid shortages.
- Rapid malfunction response.

Optimize operations and administrative follow-up

- Validation of actions performed.
- Optimization of human resources with reports on time spent.
- Securely archives reports to meet administrative requirements.

Measure your environmental impact

- Detailed monitoring of water and energy consumption, and CO₂ emission, to improve environmental management and contribute to your ESG objectives.

Optimized planning and organization

- Easily schedule cleaning and maintenance.
- Lists actions to be carried out and integrated into technical data sheets.
- Validation of actions for a rigorous and precise follow up.

Designed by
water experts to
revolutionize your
everyday life.
