

PAK

PORTABLE ANALYSIS KIT

 Patented technology

DESCRIPTION

The PAK is a fully integrated, portable water-testing lab designed for plant operators, field technicians, and water treatment professionals. Housed in a durable wheeled case, it enables high-throughput, on-site testing of critical water parameters, with no external lab or technical background required. All devices are controlled wirelessly through the Aquassist app and operate in parallel, delivering fast, accurate results from virtually anywhere.

APPLICATIONS

Water treatment service professionals

Water & wastewater treatment plants

Industrial process water testing

Environmental field sampling

KEY FEATURES

Multi-test efficiency

Runs up to five tests in parallel, significantly boosting field-testing speed and throughput.

75+ built-in water quality analyses

Chlorine, hardness, alkalinity, ammonia, iron, sulfite, turbidity, fluorescence, and more.

Field-ready & future-ready

Supports custom method development, adapting to evolving compliance and process needs.

Centralized charging system

The rugged case includes an AC-powered hub with wireless charging pads for every PTA and PSA unit.

App-guided simplicity

The Aquassist app (iOS/Android) gives step-by-step instructions, automatic data logging, and secure cloud storage.

ORDERING & PACKAGE CONTENTS

-  4 × PTA devices
-  1 × PSA device
-  Wireless charging-enabled case with AC input
-  Vials, syringe holders, adapters, and magnetic stir bars
-  Quick Start Guide + Aquassist app access
